DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 25 July 2008 has been entered.

Drawings

2. The drawings received on 27 June 2008 are acceptable. The Applicant pointed out in the Remarks filed 27 June 2008 sufficient support in the specification for the subject matter depicted.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-2 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1 and 2 recite "in terms of ball tack obtained by the ball rolling method provided for in JIS Z 0237". However, this renders the claims indefinite for several

Art Unit: 2891

reasons. The Applicant has not provided the Office with any documentation of exactly what this testing standard is, and as such, it is unknown how the ball tack numbers are obtained. It is further unknown what revision number (if any) the Applicant is referring to. Additionally, a recitation referencing an external document standard (such as JIS Z 0237) in a claim as a limitation further renders the claim indefinite because and there is no way of knowing that such a standard will be consistent in the future and remain unchanged. As such, results from the JIS Z 0237 test as currently written may be different some time in the future under an alteration or revision of the testing procedure and may not be representative of the same material property value in the future under such changes. Therefore, the scope of the claimed invention may or may not change in the future and there is simply no way of predicting the future. Furthermore, there is also no way of knowing whether JIS policy related to the maintaining numbering conventions, rules on revision numbers and test numbers, or any other identifying marks to this procedure will remain completely unchanged in the future. Unforeseeable circumstances or changes may occur at any time to JIS policy or testing standards or identifying nomenclature, even if there is no history of such changes until the present. As such, it is unknown that the scope of the claim would remain consistent and the public may be unable to identify if and when any infringement may or may not occur. Therefore, the claim is indefinite.
